A Report on Remedial Programme 2021 - 2022

Remedial Coaching is a midcourse improvement program that is organized each semester with the objective of hand-holding our students and providing learning support to improve their academic performance. The institution believes in the Latin maxim 'Cura personalis'- personal care and concern for the individual and it is one of hallmarks of Ignatian philosophy. Here individual care and attention is given to each learner. Remedial coaching is one of the efforts undertaken in this regard.

The institution restructured remedial programs with the Peer learning model in order to enhance the students' interest in learning and to make the learning process a more joyful experience. In this model of peer support, the teaching is handled by a 'student tutor' who will be responsible to teach the 'student tutees' under the guidance of the subject teacher. The remedial coaching classes were scheduled online on the MS teams platform as well as the offline mode to make the program effective.

Remedial classes were conducted in the month of November 2021 for Second and third-year UG students while the first-year students had their remedial classes in the month of January 2022. The remedial program kick-started by identifying the list of courses that require additional reinforcements through remedial sessions. Each class mentor scheduled a mentor meeting and discussed with their respective classes and identified the list of courses. The list was shared by the remedial program coordinator with the respective subject teachers. Each subject teacher identified student tutees and tutors for their respective subjects. The tutees were selected by subject teachers on the basis of low CIA grades, low attendance percentage, students with incomplete notes (in the case of practical subjects) and any student who voluntarily requests to be added to the remedial class. Proactive students who are capable of handling the peer teaching were chosen by subject teachers and were entrusted the responsibility of student tutor. The tutors were guided with respect to the concepts and topics to be covered by the respective subject teachers. There was an excellent collaboration among the students through this faculty-guided peer-learning model.
