4.2.1 Integrated Library Management System (ILMS)

ILMS, has different modules like Catalogue and Accessioning, Circulation, OPAC, Setup and Security, Acquisition, Members, Periodicals, in-out Management, One time Registration, Reports and Digital Library, and from here we can login to individual modules.

The Home page of ILMS

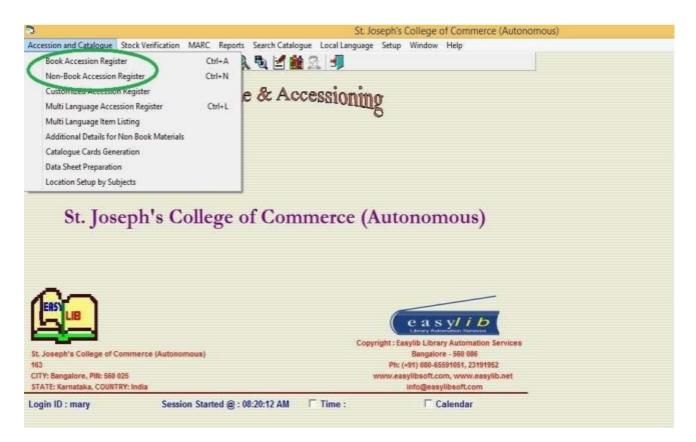

Catalogue & Accessing: This system provides cataloguing of stock of books and non-books.

- Handles multiple copies by grouping them together
- Cataloguing with Extensive Details
- o Cataloguing of non-book material including bound volumes
- Customization of the Accession Register View

Circulation System:

Circulation is one of the major functions in library operations. It deals with charging and discharging of books (issue and return). The system keeps a track of what member has borrowed, due details and reservations. Circulation is backed up by digital signature and print on charging facility that act as proof of borrowing a book.

With the help of this screen, we can do various types of circulation including regular circulation, reference circulation, and overnight circulation, loose issue circulation can be performed.

This screen helps us to issue the books regular book issue and specific period issue of Reference Books and Non-issue books which are precious or rare books.
